

Valued Walmart Supplier

Re: Completion - Facility Security Audit

Walmart stores maintains a risk-based supply chain program to ensure that sourcing and shipping facilities maintain security necessary to protect against products and shipment tampering. A supplier/service provider responsible for ensuring that their facility accomplishes the Walmart security standards for merchandise produced and shipped directly to Walmart when Walmart, or a Walmart entity, is the Importer of Record (IOR) - regardless of the destination country, or Private Brands regardless of IOR. A facility is required to participate in a third-party security audit to confirm that security standards are met.

CONGRATULATIONS! The facility below passed a security audit performed by our designated third party audit company.

Facility Name	SCHOONBEE
Factory ID (Walmart)	36177959
Facility Address	Kameelkop 17 JS, Groblersdal / POBox X678, 0470
Facility City	GROBLERSDAL
Facility Country	South Africa
Assessment #	339349
Audit Score	96
Merchandise Type	

Please inform the facility of this audit result. Successfully passing the supply chain security audit ensures continued recognition by Walmart that the supplier and production facility are trusted merchandise providers.

The audit report is provided with this letter. In an effort to ensure continuous security improvement, a Corrective Action Plan (CAP) may be attached. If attached, Walmart requires the facility to complete the CAP listing the Critical Security findings. Please work with the facility to complete and return the CAP within 60 days of the audit date to the address below based on the county where the facility is located. The completed CAP must specifically describe the corrective actions made and include proof of corrections, such as a photograph or document.
