SYNONYMOUS WITH QUALITY SINCE 1971

Schoonbee Landgoed is situated in Groblersdal, nestled in the heart of the flourishing Loskop Valley irrigation scheme, within the boundaries of the majestic Limpopo province in South Africa.

This family-owned farm, which features incredible views, is synonymous with offering unparalleled quality to its global customer base for the past 50 years. The acclaimed farm boasts two main product areas spreading over nearly 3,000 hectares and exports to 60 countries. The table grapes and citrus are well sought after in local supermarkets and throughout the world.

Schoonbee Landgoed is committed to preserve and improve our social and environmental heritage, by supporting local business and developing the skills of local small-scale farmers. Our world-class independent clinic enables us to look after the health and well-being of our valued employees. Environmentally friendly and sustainable practices are implemented which includes the erection of a ground breaking mounted photovoltaic solar farm to produce energy. Schoonbee Landgoed also endeavours to make a material impact on the future of our community by affecting positive CHANGE.

CHANGE Agriculture is an initiative launched by Schoonbee Landgoed in partnership with Thebe Investment Corporation focussing on the commercial production, packaging, marketing and sales of table grapes and citrus, grounded in the spirit and principles of the South African National Development Plan. The goal of this new business is to become a market-leading, black-owned "profit-for-purpose" farming initiative that is able to service local and international markets with premium fresh products. At the same time this initiative will empower the communities involved in the project through job creation and the provision of education, training, and healthcare services. Schoonbee Landgoed markets and sells all produce from CHANGE Agriculture as part of our Unparalleled Quality umbrella.

SCHOONBEE LANDGOED'S PURE JUICE RANGE

Schoonbee Landgoed carefully selects fruits from the bountiful orchards of the sun-drenched Loskop Valley in South Africa.

These fruits are harvested at their peak and cold pressed on the farm to capture its pure, delicious flavour in a bottle – nothing else. Citrus and pomegranate are bursting with Vitamin C and other natural nutrients. Juices pressed by Schoonbee Landgoed retain all the fresh goodness as they are **never heated**, and **no sugar or preservatives added**.

Savour the goodness of nature ...

With love from our farm to your home.

BETTER THAN FRESH: FRESH HPP

Taking our passion for fresh produce to the next level with Schoonbee Landgoed Fresh HPP Juice

Schoonbee Landgoed is dedicated to excellence, and we extend our *Unparalleled Quality* motto to all our business activities. Creating and supplying farm fresh, natural juices to the market has become a passion.

High Pressure Processing (HPP) allows Schoonbee Landgoed as a juice producer to capture the goodness of freshly squeezed juice with the added benefit of an extended shelf life.

The Juicy Details on HPP:

- HPP is a heatless preservation method that can be applied to extend the shelf life of refrigerated fresh juices significantly.
- Using HPP, already packaged fresh juices are submerged in pressurized cold water.
- The HPP process results in a product that is completely food safe, since the extreme pressure that is applied in the water chamber, deactivates harmful bacteria.
- This innovative technology retains all of the taste, colour and nutritional value of freshly squeezed juice, whilst extending the shelf life up to 90 days, when refrigerated below 5 degrees.
- HPP Fresh Juices are never heated and no preservatives are added – making it best in class for fresh, ready to drink juice with extended shelf life.

FARM FRESH

Schoonbee Landgoed is proud to offer a premium juice range that boasts the following:

- Local, farm fresh produce from the Loskop Valley, Limpopo.
- Nothing but juice, straight from our premium citrus and pomegranate fruits.

EXPORT & CONTRACT PACKING

Schoonbee Landgoed currently exports 70% of its fruit to the European Union, Middle East and Far East and has a presence in Rotterdam, the Netherlands through Schoonbee International.

Using this presence and existing infrastructure Schoonbee Landgoed has the ability to serve markets beyond South Africa, allowing consumers internationally to enjoy our high-quality products.

The Schoonbee Landgoed juice range can be developed and packed according to any client's standards and requirements. This includes supply to juice factories for further processing, mixing and packaging in frozen bulk containers. Furthermore, we offer contract packing services to supermarkets, hotel groups, wholesalers and other retail with product in its final packaging.

Whatever the preferred bottle, label and final packaging requirements are, Schoonbee Landgoed can custom develop and deliver to your doorstep, with care from sunny South Africa. Schoonbee Landgoed adheres to various global Food Safety standards including BRC and Global GAP.

SCHOONBEE™ LANDGOED

unparalleled quality

“ Love is a fruit in season at all times
and within the reach of every hand.
Anyone may gather it and no limit is set. ”
- Mother Teresa -
